PROGRAMMING ACCOMPLISHMENTS

- Python Intensive Course
- SQL Soft Skills
- AWS Certification (In progress)
- Excell Review Course (In progress)

LANGUAGE

Portuguese ●●●●●●●○

English ●●●●●●○○

Spanish ●●●○○○○○

SKILLS

- Quick Learner
- Teamworker
- Strong Communication Skills
- Great Data Intuition

PROFESSIONAL PROFILE

An independent and self-motivated person looking for an entry-level position in the Data Science / Programming department where I can utilize the knowledge I have gained during my courses. Well versed in Pandas, API requests, and GUI interfaces. I am eager to learn always more and truly passionate about programing and coding. Please read my Motivation Letter for a much better insight.

EDUCATION

100 Days of Code: The Complete Python Pro Bootcamp for 2023

Udemy Course

- Be able to use Python for data science and machine learning.
- Build GUIs and Desktop applications with Python.
- Learn automation, game, app and web development, data science and machine learning.
- Work with Selenium, Beautiful Soup, Request, Flask, Pandas, NumPy, Scikit Learn, Plotly, and Matplotlib.

EXPERIENCE

Ldesigner (1 Year)

Wordpress Developer

- Design all projects for clients in Wordpress, SEO, create their brand and iniciate their networking with the target audience.

Betway (2 Years)

Bet Settlement Executive

- Analysing data of customer behaviours that could trigger "red flags".
- Odds compiling.
- Work with various departments in order to ensure the best product delivery.

MOTIVATION LETTER.PY

My journey with programming started after I had already spent couple years working, not really able to engage well in college. I didn't land the IT course and felt like it wasn't really for me due to that.

I rediscovered the passion when working abroad for Betway, in Malta (2018). When I get focused on something I don't seem to be able to let it go, I started to be really obsessed with learning coding. Started with a really basic course on Udemy after attending to couple lesson on youtube. My first courses were for web development, starting to understand HTML, CSS and Javascript. Still remember my professor Colt Steele from the Udemy course. I decided to leave Malta to pursue this carreer change after already 5 years into this business with Bookmakers and online betting.

I was able to get into a non paid small office in my hometown thanks to a friend to start developing my skills but working with Wordpress. Even though it fullfilled a little bit my hunger for being in a developing environment, the little use of my skills that I learner with this low code software was really underwealming after some time. I ended up quitting again due to lack of oportunity for a person (self-taught) with no college course in computer science or IT.

Starting this year 2022, I decided to not delay any further my passion to work with programming and coding. I am already 27 years old, with lots of working experience that gave me several core skills. Strong communication skills since I always been around environments that I had to work with different other departments. Initiative and Leadership since working in the Igaming Industry we really do take decisions into our own hands to try and maximize our profits in the different sports markets. Working under pressure and multi tasking since it required a lot of analysis and making key decisions that could really go bad, a wrong decision from me could be really costly for the company, working with hundreds of thousands of euros.

Starting a colaboration with me guarantees a very work minded person, focused on results. I know how to utilize well the time I have for my tasks and really able to perform under a lot of pressure and stress. Fun, interactive and not afraid to express my thoughts on how to get better results in work.

I ask to not be afraid to give me a chance, because I will take that chance not making anyone regretting it. I am really eager to learn and get much better developing experience in this programing / data analysis industry.

Let's build a long lasting and fun relationship together!

João Rodrigues
